MEMORANDUM FOR THE NSCIC WORKING GROUP

SUBJECT: NSCIC Working Group Action Program on the
Evaluation of Intelligence Community Products

Proposals to establish a subcommittee to conduct a systematic evaluation of the product published by all members of the Intelligence Community have been raised at several meetings of the Working Group.

At the meeting of the Working Group on Wednesday, July 2, 1975, I propose that we set up a task force or subcommittee, similar in composition to the Working Group, as a first step in our efforts to conduct a systematic evaluation of Intelligence Community product from the consumer's standpoint. This group's initial assignment would be the evaluation of the Community's current intelligence publications.

I would appreciate your reviewing the attached evaluation project outline before the meeting so that we can discuss and take action on the proposal at the July 2 meeting.

Richard Ober
Director for Intelligence Coordination
NSC Member of the Working Group
